- All models available in 110v or 240v
- All models available with **F**wd/Rev & **V**ari-Speed
- MB50 & MB100 available with **S**wivel Base
- All models fitted with **NFC** Technology

NFC Technology : Each machine has an NFC chip which can be used to read and input data by a smart phone. For example, you can record the machine serial number, purchase data, service and repair history, etc.

This information stays with the machine and can be read with any smart phone with NFC turned on. To 'add' data you will need to download our app and follow the steps in the instruction manual that comes with the machine.
